Goulbourn Recreation Complex (Arena B Lobby)

1500 Shea Road, Stittsville

6:30 to 9 p.m.

Transit Access: Route # 96

The City of Ottawa is undertaking the Carp Road Widening Environmental Assessment Study to determine the most appropriate means to accommodate and manage increasing transportation infrastructure requirements in the northwest Stittsville area. The City's Transportation Master Plan (TMP 2013) identifies the need for Carp Road widening from two lanes to four lanes between Highway 417 to Hazeldean Road as a Phase 2 project to be completed between 2020 and 2025.

Consultation

This second Open House will provide an overview of study progress to-date, including the alternative designs considered and the evaluation criteria and methodology used to determine preliminary preferred design for the corridor. Your participation in Open House meetings is important where you can discuss the project with the study team and provide feedback. There will be on-going public consultation activities during the remaining course of the study.

The EA study is being undertaken in accordance with Ontario's EA Act, fulfilling requirements as a Municipal Class EA process for a Schedule 'C' project. The EA process will involve developing, assessing, and evaluating alternatives, which will result in a Recommended Plan which will be presented to City Council for approval.

Further information on the Carp Road Widening EA Study is available at ottawa.ca/carproad

Interested persons can provide comments throughout the EA process. Any comments received will be collected under the Environmental Assessment Act and, with the exception of personal information, will become part of the public record.

Accessibility is an important consideration for the City of Ottawa. If you require special accommodation, please call 3-1-1 or e-mail the project lead below before the event.
